

### THE BIG PICTURE...

2013

2050

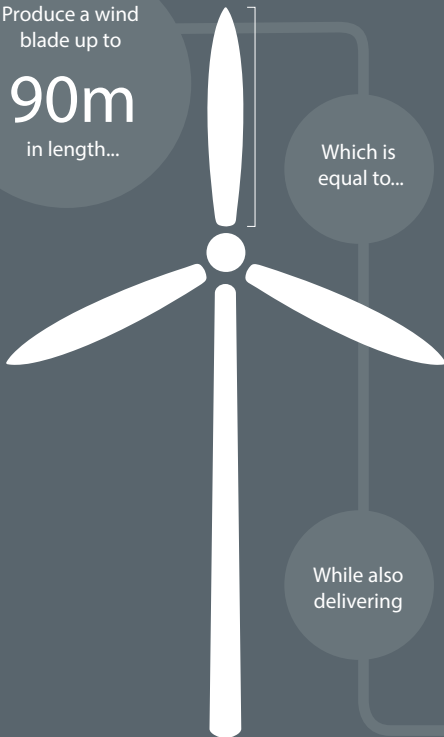

By which time it is expected

**wind energy** will supply **33%** of global energy demand

### THE WALiD PROJECT WILL...

Produce a wind blade up to **90m** in length...

Which is equal to...

A professional football pitch (90m)

Big Ben (96m)

4x Hot air balloons (90m)

9x Double Decker buses (90m)

While also delivering

**40%**

Reduction in weight

**70%**

Less maintenance

It will produce savings of **€375m**

per turbine for turbines with 10MW

And each 10MW turbine can power

1x = 100 homes

### IN 10 YEARS TIME...

Employment will **Double** within the Wind Industry

= 100,000 employed globally

benefitting the industry by 3.4 billion euros

**€3,400,000,000**
